

## **Marina Bay Landscape & Lighting Maintenance District**

### **Ongoing Projects**

- **Shell Mound at Regatta and Marina Bay Parkway**

Plant redwood trees to provide a visual screen between Marina Bay Parkway and the PG&E parking lot.

Current status: Irrigation has been reconfigured to support the new trees. Planting is in progress.

- **Marina Bay Parkway Median Crossing**

Reconfigure Bay Trail street crossing between Marina Park and the northern perimeter of the Bay Trail just north of the public tennis courts to eliminate the ninety-degree turning angle connecting sidewalk to street on Marina Bay Parkway. Add curb cuts and crosswalk striping. Add warning lights.

Current status: The design has been finalized, the contractor has been selected and final approval to proceed has been obtained from the City Council. Some trees have already been cleared, and more clearing and replanting of the median will take place. Actual construction to begin soon.

- **Weed Abatement**

Current status: Open Parks & Landscape Maintenance Aide positions have been filled, enabling the LLMD to catch up on deferred weed abatement.
